## Exceptional Individualized Education

Picabo Street Academy provides individualized academic pathways to students as they pursue their extra curricular passion. Our **year-round** model with rolling enrollment enables students to learn at any time of the day, any day of the week, and during any month of the year in their chosen location, including our Park City classrooms. We also offer individual classes to complement students' current school choice.

Pursuing a rigorous academic curriculum to enable entry into the college of preference, or remaining competitive at an elite level athletically or artistically, does not need to be a mutually exclusive choice. At Picabo Street Academy, students utilize technology-based learning coupled with high levels of **live support** and supervision, as we provide a flexible, but highly structured student-centric approach to education. Picabo Street Academy students have proven that they are driven to pursue extraordinary achievements outside of school, and we help them channel this drive into their schoolwork on a schedule that allows them to accomplish this successfully.

Picabo Street Academy offers **over 150 courses**, suitable for any aged student, which meet and exceed national, state, common core and **NCAA** regulatory standards, including AP, honors and concurrent enrollment. When able to choose the time, place, path and pace of learning, students can maximize their performance potential without compromising their academic future.

Homestay accommodation can be arranged for students wishing to attend Picabo Street Academy in Park City either for short blocks of time, or extended periods. The enriched blended learning model allows students from anywhere in the country to "attend" Picabo Street Academy, and it also allows Park City residents to not only come to school in Park City, but also take school with them anywhere in the country, or world; enrollment is not limited by geography, performance schedule or passion.
